LESS STILE = MORE STYLE!

We've increased the size range of moulds from which we build our popular Georgian GRP door. The new moulds cover the size ranges from 2286mm wide (7'6") to 2584mm wide (8'5 1/2"). What does this mean? The before and after images below illustrate the effect on the design. The end stiles on a 2584mm door reduce from 330mm to 177mm, dramatically improving aesthetics and balance of the door.

Panels	Min Width	Max Width	Minimum End Stile Width
3	1519mm	2026mm	51mm
4	2027mm	2285mm	51mm
4	2286mm	2347mm	104mm
4	2438mm	2584mm	104mm
5	2585mm	3092mm	76mm
6	3093mm	3600mm	76mm
7	3601mm	4108mm	76mm
8	4109mm	4616mm	76mm
9	4617mm	4877mm	76mm

The sizing table to the left illustrates the effect of the new moulds on 4 panel doors, all of which were originally made from one mould size. The new moulds are in use from Dec 5th and mark yet another improvement to the Wessex GRP Door range.
